Professional Summary

Aspiring Data Analyst / Data Scientist with strong knowledge in Python, SQL, Machine Learning, and Data Visualization. Experienced in data cleaning, exploratory data analysis, dashboard development, and predictive modeling using real-world datasets. Skilled in extracting insights from data, optimizing workflows, and building data-driven solutions to support business decision-making.

Technical Skills

Programming Languages: Python, SQL

Data Analysis: Pandas, NumPy, Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA)

Visualization Tools: Power BI, Matplotlib, Seaborn

Machine Learning: Scikit-learn, Regression, Classification, Feature Engineering, Model Evaluation

Databases: MySQL

Tools: Jupyter Notebook, Excel

Other Skills: Statistics, Problem Solving, Business Analytics

Work Experience

Data Analyst Intern

Apr 2025 – Dec 2025

Innomatics Research Labs, Bengaluru

- Processed and analyzed 10,000+ records using Python and SQL to identify trends and improve data quality
- Performed data cleaning, preprocessing, and exploratory data analysis on structured datasets
- Developed dashboards and reports using Power BI and Matplotlib for business insights
- Wrote optimized SQL queries for efficient reporting and faster data retrieval
- Automated repetitive data processing tasks, improving operational efficiency
- Conducted root cause analysis to resolve data inconsistencies and improve accuracy
- Collaborated with teams to support reporting and analytics requirements

Projects

Amazon Price Analysis

[GitHub](#)

- Collected, cleaned, and analyzed 50,000+ product records using Python and SQL
- Identified pricing trends, discount patterns, and anomalies through exploratory data analysis
- Built visual dashboards to monitor product trends and customer insights
- Optimized data processing scripts to improve execution performance
- **Tech Stack:** Python, SQL, Pandas, Matplotlib, Power BI

Employee Management System (SQL)

[GitHub](#)

- Designed and implemented relational database schema with 8+ interconnected tables
- Developed complex SQL queries using JOINS, subqueries, CTEs, and aggregate functions
- Optimized query performance, reducing response time by 30%
- Generated reports for employee and department-level analysis
- **Tech Stack:** MySQL, PostgreSQL

Diabetes Prediction using Machine Learning

[GitHub](#)

- Built a machine learning model to predict diabetes using healthcare datasets
- Performed preprocessing, feature engineering, and model evaluation
- Applied classification algorithms and compared performance metrics
- Developed a simple prediction interface for user input
- **Tech Stack:** Python, Scikit-learn, Pandas, NumPy

Education

B.Tech in Electrical and Electronics Engineering

2022 – 2025

QIS College of Engineering and Technology, Ongole

CGPA: 8.1/10

Certifications

- Generative AI Productivity Skills – Microsoft & LinkedIn Learning
- Deloitte Data Analytics Job Simulation – Forage
- Data Science & Analytics – HP LIFE
- Python Programming and SQL Development Certifications
