Professional Summary

Results-oriented Data Analyst and aspiring Data Scientist with hands-on experience in Python, SQL, Machine Learning, Power BI, and Data Visualization. Proficient in data cleaning, exploratory data analysis, dashboard development, predictive modeling, KPI reporting, and AI-powered applications. Experienced in building end-to-end analytics and machine learning pipelines using real-world datasets of 50,000+ records. Passionate about transforming raw data into actionable business intelligence and supporting data-driven decision-making for stakeholders.

Technical Skills

- **Languages:** Python, SQL
- **Data Analytics:** Pandas, NumPy, Data Cleaning, Data Wrangling, EDA, Statistical Analysis, Business Intelligence
- **Machine Learning:** Scikit-learn, TensorFlow, Keras, Classification, Regression, Feature Engineering, Hyperparameter Tuning, Model Evaluation
- **Visualization & Reporting:** Power BI, Matplotlib, Seaborn, Microsoft Excel, PowerPoint, KPI Dashboards, Stakeholder Reporting
- **Databases:** MySQL
- **Tools & Platforms:** Git, GitHub, Jupyter Notebook, Google Colab, Streamlit
- **Other Skills:** Data Pipeline Development, Business Analytics, Dashboard Development, Root Cause Analysis, Technical Documentation

Work Experience

Data Analyst Intern

Apr 2025 – Present

Innomatics Research Labs, Bengaluru

- Processed and analyzed 70,000+ records using Python and SQL, identifying key trends that improved data quality by reducing inconsistencies across reporting pipelines.
- Performed end-to-end data cleaning, preprocessing, and exploratory data analysis (EDA) on structured datasets to support business analytics requirements.
- Developed KPI dashboards and business intelligence reports using Power BI and Matplotlib, enabling faster data-driven decisions for stakeholders.
- Wrote optimized SQL queries (JOINS, CTEs, subqueries) to improve reporting efficiency and reduce query runtime.
- Automated repetitive data processing workflows using Python, reducing manual effort by approximately 40%.
- Conducted root cause analysis to resolve data inconsistencies, improving overall data accuracy across datasets.
- Collaborated cross-functionally with teams to gather reporting requirements and deliver actionable insights.

Projects

CropRx – AI Crop Failure Predictor

GitHub | Live Demo

- Built a Random Forest classification model for crop failure prediction, achieving strong accuracy on imbalanced agricultural datasets.
- Engineered features from soil and weather data, improving model prediction accuracy through targeted feature selection.
- Deployed an interactive Streamlit web application with real-time crop recommendations for end users.
- **Tech Stack:** Python, Scikit-learn, Streamlit, Pandas, NumPy

Diabetes Prediction – Deep Learning

GitHub | Live Demo

- Developed an Artificial Neural Network (ANN) model for binary diabetes classification with preprocessing and normalization pipelines.
- Implemented hyperparameter tuning and model optimization, improving validation accuracy.
- Deployed an interactive Streamlit application for live predictions.
- **Tech Stack:** TensorFlow, Keras, Scikit-learn, Python

Amazon Price Analysis

GitHub

- Analyzed pricing trends and discount patterns across 10+ product categories using 50,000+ records.
- Cleaned and transformed data using Python and SQL, building Power BI dashboards for business intelligence reporting.
- **Tech Stack:** Python, Pandas, SQL, Power BI, Matplotlib

Employee Management System (SQL)

GitHub

- Designed a normalized relational database schema with multiple interconnected tables for HR data management.
- Implemented complex JOINS, Subqueries, CTEs, and Aggregate Functions to generate analytical reports.
- Optimized query performance, reducing average query execution time significantly.
- **Tech Stack:** MySQL

Certifications

- BCGX GenAI Job Simulation – Forage (2026)
- PwC Digital Assurance Job Simulation – Forage (2026)
- Deloitte Data Analytics Job Simulation – Forage
- Generative AI Productivity Skills – Microsoft & LinkedIn Learning

Achievements

- Completed Data Analyst Internship at Innomatics Research Labs, Bengaluru.
- Built and deployed 4+ end-to-end Machine Learning and Data Analytics projects with live demos.
- Analyzed datasets exceeding 50,000+ records using Python and SQL across multiple projects.
- Earned job simulation certifications from Microsoft, Deloitte, BCGX, and PwC via Forage.

Education

B.Tech in Electrical and Electronics Engineering

2022 – 2025

QIS College of Engineering and Technology, Ongole

CGPA: 8.1/10
